

Call us first. Day or night.

If you are worried about your child's health, call us, even at night. When we are open, our staff can help. When our office is closed, you will have the option to speak with a nurse.

The after-hours nurse will take your call, and:

- Ask about your child's symptoms
- Give you advice about your child's health needs
- Provide advice about medicines
- Talk to your physician, if needed
- Refer you to an ER or urgent care center, if needed

If your child has a life-threatening emergency, call 911.

The after-hours nurse advice line staff does not diagnose but can offer care advice. This advice is based on care guidelines approved by us.
